COTONEASTER PRAE ECO X

* This is one of the hardesty Cotoneasters and went through 20 degrees
- below zero without any harm. It has large berries like cranberries
* which color up in the middle of August and remain on until very late
- Fall. It grows rather flat and makes an ideal plant to mix in with
* foundation plantings and especially with ranch type houses. It also
- makes an ideal low spreading hedge.

- *RHUS COTINUS ROYAL PURPLE* -

* (New dark purple-red leaf Smokebush) *

- There are several varieties of Purple Smokebush although Royal Purple is -

* considered the very best. A number of varieties of Smokebush have been -

- tried out in the nursery with Royal Purple always turning out to be the -

* most outstanding. I am convinced of this to the extent that it is the -

- only one now being propagated in the nursery. Royal Purple keeps its -

* rich dark purple reddish colored foliage from Spring to late Fall. In -

- late summer the matured leaves show a mottled edge which is a light red -

* edge around the dark purple leaf. It is an outstanding plant in that it -

- draws the attention of all who visit the nursery and is greatly admired -

* for its brilliant foliage. The foliage is darker than any red Japanese -

- maple. The plant is adaptable for use as a lawn specimen especially in -

* locations where the Japanese Maple is not hardy. Royal Purple is the -

- only Purple Smokebush to receive a Certificate of Merit from the Royal -

* Horticultural Society. The branches make an excellent filler for bouquets* -

- especially with Chrysanthemums. -

OUR 35TH YEAR IN BUSINESS

Novelties

New

VIBURNUM CARLESI COMPACTA

This plant was discovered several years ago in the nursery in a block of Viburnum carlesi. It is slower growing and has distinct dark green shiny leaves. It grows into a very compact plant and for this reason is called Compacta, ideal for use in foundation plantings. It buds up very heavily when a matured plant. The size, color and fragrance of the flowers are exactly like those of Viburnum carlesi. This plant is a distinct novelty of which a limited quantity is offered.
